### The Dodecagram of the "MoreThanPerfect" Healing

---

In this address I shall try to convey how - by treating with the fifty thousandth homeopathic dilutions - the patients are looked after their path toward health, up to the point where their *Vital Force* is capable of reaching a condition of advantage over the *Ill Force*, so to achieve a healing which is defined as "morethanperfect".

To recover does not mean taking care of the horizontal axis of our life only - related to the matter, to the body -, but also of the other plane, the more invisible one and placed on the vertical axis, the axis of our Spirit, mutually harmonizing them through the treatment of the "intermediate zone" (the Soul) which connects them and keeps them "communicating".

How is it possible to revitalize the cells, the organs, and then the soul and the psyche as well? First of all, willing is needed, then - on the homeopathic level - it is necessary to identify the proper "simillimum" remedy which, once diluted to the fifth thousandth, becomes so subtle and penetrating to awaken that quid of *Vital Energy* that will allow the full recovery of every equilibrium.

The biological clock does exist, doesn't it? Then, as a matter of fact, the mean by which we communicate with it actually does exist!

And this fact changes the current rules: by favouring the scheme of the *Dodecagram*, the *Vital Principle* specifies itself through the remedy and enters from a different door, from that one placed on the vertical axis, operating (once the "morethanperfect" condition achieved) a sort of reversal of the arrow of time and no more accepting information from the past, but from the

future. That is, we proceed from a disharmony-entropy to a healing-syntropy (a term used by the forgotten Prof. Fantappiè). Once this result is reached, the material part only (which we know to represent approximately 5% of ourselves) will remain subject to the "passing-of-the-time"; that's how we can revitalize in order to recover and "to rejuvenate".

*De facto*, the Vital Principle has its own frequencies, but it is possible to re-tune them, modifying the **sinusoidal wave** in its movement from a centripetal direction to a centrifugal one, so realizing the authentic healing and the best prevention (as admirably expressed by Master Hahnemann in paragraph 9 of the *Organon der rationellen Heilkunde*).

Getting into details, the friction between the two *Forces* at stake is the origin of the manifestations of the symptoms which are observed in the patients, the *Ill Force* having a centripetal direction while the *Vital Force*, on the contrary, a centrifugal direction. The treatment follows a precise temporal punctuation, expressed by the Septenary Rule in accord with the *Law of the Octave*.

Under the perspective of a set of rules, in order to achieve an authentic healing the following fundamental points are to be taken into account:

1. During the recovery phase no **step** can be skipped without involving a damage;
2. Life conditions, health and/or the illness of the successive **steps, periods, and phases** are dependent on the balance and/or unbalance of the preceding **steps, periods, and phases**;
3. The **steps, periods, and phases** are cyclically connected with the successive **steps, periods, and phases**;
4. The development proceeds by pulsation, in a vital, dynamic, spiry mode.

One **Step** is represented by 1 year. One **Period** is composed by 7 years, divided in two **Sub-periods** of 3 years (1-3 and 4-6, 8-10 and 11-13, 15-17 and 18-20, and so forth), with a **semitone** (3/4, 10/11, 17/18, and so forth). One **Phase** is composed by 3 **Periods**. The years multiple of 7, which close the various **Periods** are **Neutrality** years; the most important are those which close the **Phases**: 21st, 42nd, 63rd, 84th.

### **The Septenary is a scale of opposite and complementary values**

The *Septenary* can also be viewed as a scale of relative values. It turns out that the symmetrical and complementary steps (see below) are also of opposite sign. This shows in greater evidence the existence on the physical plane (and, in figured sense, the physical and hyper-physical space) of the three regions characterized by the lower negative tern, by a neutral intermediate region (between 3 and 4, 10 and 11, 17 and 18, and so forth), and by an upper positive region. The friction between the two *Forces* at stake is the origin of the manifestations of the symptoms which are observed in the patients, the *Ill Force* having a centripetal direction while the *Vital Force*, on the contrary, a centrifugal direction.

In a manifestation like ours, established onto entropy and disorder, any living system which functions perfectly will show phases during which the *Ill Force* is, so to speak, in advantage; and phases where the *Vital Force*, regaining the balance, will restore the equilibrium condition inside the *Vital Principle*. Should everything work perfectly, we will find again the equilibrium condition in the *Neutrality* years: 7, 14, 21, 28, and so forth
